

Disposable Panel Filter

Product Specifications

PTA Series

The **PTA Disposable Filter** shall be constructed of a single piece of heavy-duty, one piece, craft board frame. The metal grid shall be thermally-bonded internally to the frame. The metal grids shall provide an 82% open area. All corners shall be closed and sealed. The filter media shall be 100 % non-woven polyester and constructed in a progressively dense fashion from the air entry to the air exit side. Disposable panel filters shall be rated to withstand temperatures up to 180 degrees Farenheit. All filters shall be classified under U.L. std. 900.
